PROFILE

Data Engineer with a Master's in Big Data and Cloud (EDEM, 2025–2026). I have built pipelines on Google Cloud with batch and streaming ingestion, a bronze/silver/gold layered architecture in BigQuery with Dataform and dbt, and infrastructure as code with Terraform and CI/CD. Before that, three years in digital marketing and SEO, analysing business data with BigQuery and Looker Studio. Available immediately, in Valencia or remote.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Google Cloud:** BigQuery, Cloud Storage, Dataform, Pub/Sub, Dataflow (Apache Beam), Cloud Run, Cloud SQL, Firestore, Vertex AI, Dataplex
- **Transformation and quality:** dbt, Dataform, medallion architecture, data quality assertions
- **Infrastructure and CI/CD:** Terraform, Docker, Docker Compose, Kubernetes, GitHub Actions, Linux
- **Databases and APIs:** PostgreSQL, Firestore, FastAPI
- **Visualisation:** Looker Studio, Grafana
- **Master's coursework:** PySpark, Kafka, Airflow

PROJECTS

Employee churn prediction pipeline on Google Cloud · Master's thesis with Quantia Ingeniería y Consultoría · team of 5 · 06/2026 – 07/2026

- Designed and built the ingestion of external labour-market sources (Eurostat and the Adzuna API) to benchmark internal salaries against market rates by role.
- Normalised bronze-layer names and types to give the team a stable schema, and built the gold views that feed the retention dashboard in Looker Studio.
- Medallion architecture in BigQuery with Dataform, quality assertions, PII tags and a Dataplex catalogue; infrastructure in Terraform per environment. The pipeline processes a new period of data with no manual intervention.
- Stack: BigQuery, Dataform, Cloud Storage, Vertex AI, Dataplex, Terraform, Python, SQL.

CloudRISK · serverless streaming pipeline for a geolocated game · Master's Data Project · 04/2026

- Top contributor to the team repository: FastAPI backend, walker process as a Cloud Run Job, Terraform infrastructure, CI/CD and a bot simulator.
- Pub/Sub → Dataflow (Apache Beam) → Firestore and BigQuery flow, deployed end to end with a single terraform apply. Estimated cost under €3 per month at 10 games a day.

Valencia air quality monitor · Master's Data Project · 01/2026 · recognised as the master's top team

- Second contributor on the team: real-time ingestion from monitoring stations, dbt transformation models running every 5 minutes, and integration of the services in Docker Compose.
- Grafana dashboards and Telegram alerts when thresholds are exceeded. Stack: PostgreSQL, dbt, FastAPI, Docker Compose, Grafana.

EDEM Student Hub · EDEM-GFT Hackathon 2026 · team of 6 · 05/2026

- Backend and architecture: FastAPI API with JWT and a conversational agent (Google ADK + Gemini 2.5 Flash) over 24 tables in Cloud SQL and vector search in Vertex AI. Three Cloud Run services deployed with Terraform and GitHub Actions.

Supermarket price monitor · personal project · 06/2026

- End-to-end daily pipeline: Python scrapers, product matching between Mercadona and Dia, SQL views in PostgreSQL and a Kubernetes CronJob on a Raspberry Pi, with price history and a trends dashboard.

EXPERIENCE

Freelance developer · Hoteles Cumberland (chain of 4 hotels) · remote · 07/2026 – 09/2026

- Solo end-to-end commission, from proposal to deployment: in-house website with a booking engine, admin panel, guest CRM and automated emails. In production since 08/2026.
- Automated test suite and an editing manual so the client can maintain the site without coding. Stack: Next.js, TypeScript, PostgreSQL, Prisma.

Marketing Specialist · Elite Sports 17 S.L. · Valencia · 05/2024 – 08/2025

- Marketing data analysis with BigQuery and Looker Studio.

SEO Specialist / CRO Specialist · Grow Barato (GB The Green Brand) · Valencia · 04/2023 – 05/2024

- Organic search (SEO) and conversion rate optimisation (CRO) for the e-commerce site; data analysis with BigQuery and Looker Studio.

SEO/SEM Marketing Assistant · RANKTOP · Valencia · 06/2022 – 12/2022

- SEO audits, SEM campaign management and performance metrics analysis (ROI, CPC, CTR) to set goals per client.

Neuromarketing Intern · Neurocatching · Valencia · 02/2022 – 07/2022

- CRO analysis using eye-tracking and facial coding data to improve client sales.

Marketing Research Specialist · Porvenir Pensiones y Cesantías · Colombia · 11/2020 – 10/2021

- Designed quantitative and qualitative data collection frameworks, applied statistical methods and reported findings for strategic decisions.

Earlier experience (2014 – 2020): junior internal auditor at Hotel Cumberland (Caracas), marketing internship using SAP at British American Tobacco, and administration and accounting at Altaplast C.A.
